

Mercuriser

I am looking for a wiring harness for a Mando alternator. Do you have any in stock?

Here is a quote for the harness you need to use with your Mando alternator.

84-861236A2 HARNESS (MANDO ALT. USED) \$325.00

I did find one person in Canada that has one of these harnesses in stock so I could supply it.

So just to review:

- 1) Mercuriser no longer supplies the harness that is used on your engine with the Mando Alternator, but
I did find a guy who has one of these harnesses in stock.
- 2) You could swap you alternator over to the Delco alternator but you would need to change the mounts
and the belt to do so (we can provide).
- 3) Or you could purchase the Delco harness and rewire to fit your Mando. This is a little complicated
as you would have to re-pin and do some splicing.

Unique solution ID: #1271
