39670A38 Replacement Question

Hello Sir:

The 39670A38 number has been superceeded to a number of different parts depending upon your engine. There is a bulletin describing this change.

Please let us know which replacement one you need. If you are unsure, just give me the model and approximate year of your engine (and serial number if you can) and I will find out which you need.

Thank you.

J.D.
