Thornycroft Question

hi im looking for a bell housing adaptor plate i have a 345 thornycroft 6cyl to suit borg warner v drive thanx

Hello:

I have heard of a Thornycroft, but I don't know which SAE housing it has on the back.

Can you tell me which SAE housing you have? If you don't know it, you can measure the housing and I can identify it. I will need the outside diameter, the inside diameter, the number of holes and the distance from a hole center point to hole center point.

So SAE 4 has an outside diameter of 403.23 mm, an inside of 361.95 mm and a 381 from center point hole to opposite centerpoint hole. It has 12 bolt holds with a hole diameter 10.32 mm.

J.D.
