

Sterndrives

Will the Garden Hose Engine Flush kit work with my 1999 Volvo Penta 4.3GL PBYC 4110167432 3868756?

Sure. It will work with your engine. You will have to measure the diameter of the water hose (the hose that goes from transom shield to R/W pump) to make sure you get the correct "T" though (either 1" or 1.25" diameter).

We have all the parts in stock for this and it should take you about an hour to do so.
