

# **Volvo Penta**

## **Volvo Steering Pump 855860 Now 855872**

### **Question**

Hello:

The new steering pump 855872 is a direct replacement for power steering pump 855860. However, 855860 had a pulley that was held on by 4 bolts, but the new power steering pump has a pressure fitted pulley that goes over the shaft. So the question is what is the new pulley for the new steering pump?

Thank you

J.d.

\*\*\*\*\*

On that pump shaft is a hub and on that hub is a pulley, the pulley is fixed on the

# Volvo Penta

hub with 4 bolts , the hub of the old pump needs to be transferred to the new pump because it is no longer available.

Thank you,

FRANK
