

Volvo Penta

Where can I find an exhaust elbow kit, part number 23174565?

Hello:

We can get you the elbow that you need, but will need to know exactly which D4 you have.

The part number 21734565 was a kit that Volvo Penta offered for a short time that came with the elbow and all the connectors and some hoses. Fairly soon they discontinued the kit and went to selling all of the parts separately.

A similar kit was 21187501 which used to include the elbow 3841506 and the other parts but was discontinued.

If you get me the model number of the D4 and, if possible, the serial number, I can quote you the parts that would have been in the kit.

JD.
