

Volvo Penta

Where can I find a gimbal ring 3856987?

Hello

The gimbal ring 3856987 used to come with the housing (3857979) with the 1" water line. Eventually Volvo Penta stopped using the 1" water line housing and switched to the housing 1.25" water line housing (3807964) and swapped the gimbal ring to the 3808365.

So the gimbal 3856987 ring has been superceeded to the 3808365 ring and expects it to be partnered with the housing 3807964 and the 1.25" water line. However, the 3856987 will still work with the earlier housing.

So the 3808365 is the one you need. I would also replace the washers and wear rings when I did the swap.

JD.
