

Volvo Penta

Do you carry test strips for Volvo VCS coolant? I would like to check the freeze protection remaining and determine whether I need to change the coolant before winterizing the engines.

We don't carry test strips, but NAPA or VIP have a refractometer (about \$85) that tests nicely.

We don't tend to use the less expensive hydrometers (\$15) as they only work on Ethylene Glycol based

coolants while the refractometer works on all coolants (Propylene Glycol as well - yellow and red).

Besides the refractometer is way more accurate.
