

Volvo Penta

Before I order via your website could you let me know if you have stock of 4 Volvo Penta valve guides 840281.

These 840281 guides are not available, from Volvo Penta. They are having some issue with the suppliers of these and can't get them out so they have NLA them.

However, I do have a work around that we use. We take 3582561 which is for the TAMD41P and have them machined at a shop so they are identical to the 2000 series (or MD6/7) engines.

We have used them for quite a while and they work well.

This is not a Volvo Penta solution (Volvo Penta has no solution) but one that we engineered.

Unique solution ID: #1222
