

Volvo Penta

Is the fresh water cooling kit #3842763 still available?

I am sorry but Volvo Penta has discontinued 3842763 the fresh water cooling kit. They no longer supply the kit.

I meticulously put together a kit for your Fresh Water cooling swap over.

The price of purchasing these parts separately is more expensive than the kit. The additional price is \$586.99 per kit.

One of the hoses in this kit is not available so you have to use a raw water cooling hose and cut it down to fit. There are also two clamps that are NLA but I have replaced them with similar (slightly larger). Everything else should be the same as what was in the kit.
