

Volvo Penta

I'm looking to replace the wiring harness. Volvo Penta part #3858130. Of course its obsolete. Do you have one available?

I am sorry but this harness 3858130 is long expired.

However, I do have a company that can rebuild your harness
if you want to send us your old harness they can rebuild it.

Usually in the \$1,200 range. They do a great job but they
do take about three weeks to do the work.
